

MicroTrap™ Corporation

MT 1000

Continuing the Micro Trap tradition of quality and innovation, the MT 1000 incorporates features designed to meet your most stringent air filtration requirements. This vertical configuration makes transport easy and efficient. The tough one-piece polyethylene enclosure is dent and leak proof, providing long life and visual identification on the job site.

Features

- Produces true 500 to 1000 CFM air flow
- Enclosure: high density polyethylene
- Motor: 1 HP, two speed, with thermal overload protection
- Exhaust Duct: 10 inch
- Overall Dimensions: 20"x 23"x 40"
- Weight; 94 Lbs. with filters
- Power requirements: 115 volt, 5 amp, 60 Hz
- Filters: 3 stage design, with final stage HEPA filter
- Control Panel: on/off switch, speed switch, pressure gauge, audible and visual alarms
- Certification: built to ANSI standard Z9.2
- DOP Test: Optional and available on request
